Professional Summary

Resourceful Information Technology professional with a background in Business Information Systems and hands-on exposure to IT infrastructure, system support, and data-driven environments. Experienced in basic network setup, cable termination, server rack organization, system troubleshooting, and database environments. Demonstrates strong attention to detail through data annotation work supporting AI systems. Also develops web-based systems integrating databases and user management. Currently strengthening cloud computing skills through the AWS re/Start program.

Core Competencies

- IT Support and System Troubleshooting
- Network Foundations and Connectivity Testing
- Cable Termination and Server Rack Organization
- MySQL Database Setup and Querying
- Backup and System Update Procedures
- Full-Stack Development (React, Node.js, MySQL)
- Cloud Computing Concepts (AWS)
- Technical Documentation and Reporting (Administration Task)
- Workflow and Records Management
- Digital Systems and Data Quality Processes

Education

BSc. Business Information Systems — Valley View University (2025)

Diploma in Public Administration — Koforidua Technical University (2023)

Professional Experience

Freelance IT & Web Support | 2024 – Present

- Built and tested a web-based Employee Management System using React, Node.js, and MySQL.
- Performed technical reviews of system performance and user access workflows.
- Supported system documentation, testing, and validation processes.

Data Entry Officer — LexiPack Ghana LTD, Tema Industrial Area | 2026

- Enter and update daily production data accurately into Excel-based reporting systems.
- Monitor raw material stock levels and generate requests when inventory runs low.
- Maintain organized digital records of production and inventory data for reporting and tracking.
- Verify data accuracy and consistency to support operational and management decisions.

Certified Data Annotation Specialist — AyaData | 2025

- Worked on data annotation tasks supporting AI and machine learning systems.
- Maintained high data accuracy and quality standards within digital workflows.

ICT Intern — Koforidua Technical University ICT Directorate | 2024

- Gained hands-on experience in network testing, device configuration, and connectivity verification.
- Performed cable termination, keystone repairs, and MySQL installations.
- Assisted with server and switch organization within network racks and supported routine system maintenance.

Administrative Assistant (National Service) — Koforidua Technical University | 2023 – 2024

- Managed documentation, reporting, and records systems.
- Supported compliance workflows and administrative controls.

Technical Skills

IT Support • Networking • MySQL • React • Node.js • Cloud Concepts (AWS) • System Troubleshooting • Technical Documentation • Database Systems

Certifications

Web Technology Certificate — Ministry of Digitalization and Communication, Ghana

AWS Certified Cloud Practitioner — AWS re/Start (Ongoing)

Projects

Employee Management System (Full-Stack Project): Developed a role-based employee management system featuring authentication, employee records management, and database integration using React, Node.js, and MySQL. Project links available upon request.

Developed Personal Portfolio for a Safety Officer. Link available upon request

Referees

Available upon request.
